

1 Our sincere gratitude

Takeway® G1 Tripod is well-designed to support T1 Clampod (Note 1) for shots taken in the standing position, and it maintains Takeway products' great quality, portability, and lightweight. Takeway® G1 Tripod makes T1 Clampod easier to use for shooting in the standing position with various electronic products such as the 6-3 digital single-lens reflex cameras (DSLR). By adding accessories, it can be used as a simple support stand to hold tablets or be used independently for digital cameras and any other device with 1/4 inch screw adapter. The tripod itself only weighs 77g; however, it has a maximum load capacity of 3 kg and can be carried in small handbags. Wherever you go, enjoy the convenience and possibilities brought by the Takeway® G1 Tripod.

2 Please test the relevant components and read responsibility statement before using this product

Before using this product on your consumer electronic products, please check Takeway® G1 tripod and its accessories for damage or deformity. If there is any, please contact the salesperson to exchange your product to prevent damage of your consumer electronic products or personal injury caused by the flawed product. The company takes no responsibility and assumes no liability for the loss or inconvenience caused by user's own negligence.

6 Assembly and Operation

6-1: Assembling, disassembling, and storing with the Takeway® T1

6-1-1: Remove the Original T1 Stand

T1 comes with a Takeway® factory A stand, as shown in figure. Remove the factory stand by sliding it upwards and store it in the storage pouch.

6-1-2: Assembling the T1
Line the groove of the G1 with the A bottom crossbar of the T1 stand. Press and secure it.

Attach the B fixing bracket with the mark facing forward (B as fig shows). Attach the G1 to the clampod and secure it by tightening the screw. Shake it lightly to make sure that it is firmly fixed to prevent devices from falling during use.

6-1-3: Storing G1

3 4 After assembling the G1 the support can be stored at the bottom when not in use to avoid obstacles when clamping. Please note that when storing, start with the 3 front feet.

6-1-4: Complete assembling the T1+

6-2: Mounting and using the T-B01 Ballhead

The T-B01 Ballhead (Note 2) referred to in the assembly instructions is a standard accessory for the T1. We recommend purchasing additional T-B01 Ballhead (sold separately) for added convenience when using.

6-2-1: Mounting and using the T-B01 Ballhead

Line the screw with the A screw hole at the base of the T-B01 Ballhead. Use a flathead screwdriver to secure the platform. Shake gently to make sure it is secured to prevent items from falling and getting damaged during use.

6-2-2: Complete the mounting of the T-B01 Ballhead

6-3: Mounting and using digital cameras

When using the G1 Tripod independently, the shooting angle may be more limited. We recommend purchasing a T-B01 Ballhead (sold separately) for added convenience.

6-3-1: Mounting a digital camera
Line the screw with the A screw hole at the base of digital camera. Use a flathead screwdriver to tighten the screw. Shake gently to make sure the base is screwed in tightly to prevent the product from loosening during use.

6-3-2: Complete the mounting of a digital camera
